Digital Transformation

Grandcom offers comprehensive solutions to businesses embarking on their digital transformation journey by revolutionizing traditional communication channels. Through our integrated SMS Message link, MMS, Email, and WhatsApp communication gateways, Grandcom empowers businesses to embrace digital transformation ensuring efficient digital communication with their customers and ensuring they are ahead in today's rapidly evolving digital landscape.

Transforming Communication Methods.

1 Instant Delivery and Tracking
Our solutions provide instant delivery with the ability to track delivery and receive read receipts, ensuring efficient communication.

2 Cost-Effective and Eco-Friendly
Save money on printing and postage while adopting paperless and eco-friendly solutions for your business communications.

3 Enhanced Customer Access
Give customers easy access to relevant notices without the need to download complicated apps, simplifying their experience.

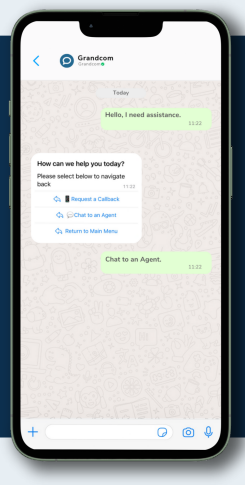
4 Security and Integration
Benefit from integrated payment gateways, password security, and customized reporting to meet your specific business needs.

Action SMS

Grandcom's Message Link solution securely delivers documents, such as statements, legal notices, policies, bills, images, and other confidential documents, directly to your customer's mobile phone. You can track whether a recipient has received and opened a document, and you can customize your mobile link to suit the needs of your business.

WhatsApp

WhatsApp facilitates direct communication with clients and customers, streamlining interactions. Integration with customer service platforms enables real-time support and issue resolution. Moreover, WhatsApp Business API integration allows for automated messaging, appointment scheduling, and order tracking. Leveraging these features can enhance efficiency, responsiveness, and overall customer satisfaction.



Cell Sign

Digital Signature Tool
Cell Sign is a digital signature tool within our document upload product, allowing customers to sign important documents directly on their mobile phones.

Branded Documents
With Cell Sign, you can effortlessly send your customers branded documents to sign in your unique style, maintaining brand consistency.

Secure Encryption
It employs SSL-grade encryption to protect the documents, ensuring everything is secure and maintaining confidentiality.

Document Upload

A mobile tool that enables your customers to quickly upload documents from anywhere directly to your environment. Our SMS-initiated document upload feature allows your customers to upload important documents from their mobile phone camera, and we will send the documents to you via email, SFTP, or integrated API. Each document will be uniquely tagged so you can easily identify which customer it was received from.

Digital Forms

Comprehensive Form Solution
The Grandcom digital form solution enables your customers to fill out important documents, upload necessary files, and sign relevant terms in one go.

Mobile-Friendly Experience
Improve your clients' experience and reduce friction caused by limited access to other communication technologies with our simple form completion process.

Efficient Document Delivery
Signed documents can be promptly delivered back to the client in real-time or batch formats, streamlining the entire process.
